Hi Nicole,

Thank you for your draft letter to Admiral Chadwick. As discussed during our meeting with Peter, I agree that a letter from both Keith and Jeff to Admiral Chadwick is appropriate. I met with both Keith Kawaoka and Joanna Seto, our new Environmental Health Program Administrator for the Environmental Management Division, and DOH offers the following draft (with tracked changes) for your and Jeff's consideration. I would also like to formally introduce you to Joanna in a meeting this week, preferably around 12:00 HST (3:00 pm PST) on Wednesday, April 7. If you are not available at this time, please let me know of another date and time that may accommodate your schedule.

Thanks,
lene

Hi Lene

Attached is a draft letter to Admiral Chadwick. We hope to be able to send in the next two weeks if possible. Lets discuss whether to include the list of deficiencies as our thoughts are that we'd like to convey the big ticket issues and including the entire list of NODs could detract from the overall message. Please let us know if you would be able to discuss early next week.

Thanks
Nicole

Hi Nicole,

Thanks for the email. I'm fine with sending a letter to Adm Chadwick with expectations on the TUA Decision Document, and perhaps appending a copy of the TUA response letter with the list of deficiencies that was sent to Capt. Meyer.

Regarding the long-term plan, we can work on formulating our expectations.

If you have a draft letter, I can use that to share with the DOH team as our basis for discussion.

Thanks for your work on this.

lene

Hi Lene

I hope all is well with you. I am checking in with you on an idea Steve and I had after our joint conversations with Peter. As suggested in this attached memo that Peter sent to both HDOH and EPA, we thought we could send a joint letter to Capt Chadwick highlighting the items that must be addressed in their TUA response. This would cover high level items like long-term strategy and adequate comparisons to other options. We are thinking that this could also be used as a talking point for higher level management to convey our over-arching concerns about how the Navy is approaching the TUA responses – in a piecemeal fashion as opposed to holistically.

In order for this to be helpful, we think we should send in then next couple of weeks. Please let me know your initial thoughts and if you'd like to pursue, let's have a short call. We've drafted a framework of a letter but will hold off sending until we hear from you.

Thanks much,

Nicole
